Professional Experience

3 years, 10 months

Cloud Imperium Games

Full-time · AAA · 7 months
Wilmslow, United Kingdom

Tools Programmer

September 2020 – Present · 7 mos

Programmer on standalone (out-of-engine) tools programming in C# on *'Star Citizen'* and *'Squadron 42'*.

- Maintained tooling for game-data authoring
- Created a bespoke asset management visualisation and change tracker
- Maintained core game code in C++

TT Games

Full-time · AA · 2 years, 3 months
Brighton, United Kingdom

Games Programmer

May 2019 – September 2020 · 1 yr 5 mos

Full-Stack games developer in **C#** (.NET Core and Unity) on the mobile title *'LEGO® Star Wars™ Battles'*.

I was personally responsible for the creation and release of the servers and databases for **clans** and **leaderboards**.

Junior Programmer

July 2018 – May 2019 · 10 mos

Gameplay programmer in **C#** (Unity) on the mobile title *'LEGO® Star Wars™ Battles'*.

When I first joined the team, I worked primarily on gameplay. I created the **data delivery mechanisms, configuration system, unit AI**.

I also created helpful tools for **saved game data management, profile management, and network debugging**.

Eneme Entertainment

Full-time · Indie · 1 year
Remote Working, United Kingdom

Programmer

July 2017 – July 2018 · 1 yr

I joined the indie title *'Eitr'* team as a remote programmer. I programmed many core gameplay systems such as the **inventory system, item system, tooltips, character stats, skill trees, input mapping, and achievements**.

Programming on *'Eitr'* inspired my *RPGCore* open-source project.

Skills

FRONTEND

- Unity, C#
- Gameplay Programming
- Tools Programming
- Technical Art
- UI / UX

BACKEND

- Database Infrastructure
- Scaling and Security
- ASP.NET Core (MVC)
- Blazor Web-Tools
- Unit/Integration Testing

Hobbyist Experience

Unity Asset Store

Self-Employed · Unity Asset Store

Asset Store Developer

2017 – Present

Produced assets for the Unity Asset Store, most notably *'AssetIcons'*.

Maintenance of the assets has been ongoing with my most recent major update for the asset released 2020.

Out of the Blue Studios

Volunteer · Out of the Blue Studios

Remote Programmer

March 2017 – June 2017 · 5 mos

Worked on the Unity projects *'Astral Swarm'* and *'Lilypad Leap'* now published on Google Play.

These projects proved to investors the worth of the team and now Robin Hughes runs the studio-for-hire *Your Future Games*.
